YessBoss	YessBoss is an online home utility services platform. YessBoss provides a platform for the customer to book their services and helps the technicians manage their appointments.

Projects Environment

Visual Studio Code, Android Studio, Node js, MySQL , Cordova , Ionic Framework, JDK 1.8

Role and Responsibilities

- Create engaging and responsive user interfaces using Angular framework, HTML, CSS, and TypeScript.
- Use CSS to style HTML elements and Angular components, applying layout, typography, colors, and visual effects to enhance the appearance and usability of the application.
- Utilize version control systems such as Git for managing and tracking changes to codebase.
- Work closely with back-end developers and designers to integrate front-end components with server-side logic.
- Conduct thorough testing and debugging to ensure the quality and reliability of front-end code.
- Design layouts that adapt gracefully to different screen sizes using CSS media queries and Angular Flex Layout for flexible grid layouts.
- Utilize the Google Play Console to manage app releases for Android devices. This includes uploading APK or App Bundles, defining release tracks (such as production, beta, or alpha), and managing staged rollouts.
- Use TestFlight, Apple's beta testing platform, to distribute pre-release versions of the iOS app to external testers.
- Upload builds from Xcode or using App Store Connect, invite testers via email, and manage feedback and crash reports. Attended Client meetings frequently for gathering requirements.
- Given presentations to clients about the developed product and made negotiations about new requirements.
- Working closely with customers, colleagues and third parties to ensure smooth operations to deadlines.
